My Individual AI Assistant

My Individual AI Assistant

A flexible platform for secure AI – locally deployed, fully privacy-compliant, and designed for maximum cyber resilience. Compatible with all leading LLMs.

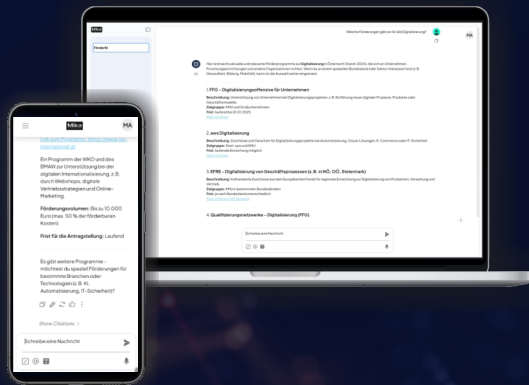

**Your AI. Your Knowledge.
On Your Server.**

What is Mikis?

Mikis is a modular software platform for the intelligent use of internal data – powered by artificial intelligence, without any dependency on external cloud services.

Your benefits:

- Local or private cloud deployment
- No data transfer to third parties
- Maximum cybersecurity – locally deployed
- GDPR- and AI Act-compliant
- Full control over infrastructure and content

➔ mikis-ki.at

Technologically Leading.

Compatible with all major AI models:

GPT, Llama, Claude, Mistral, Gemma – available locally or via cloud deployment.

Flexibly Deployable.
